Conversation One

试题详解 >

Section A

M: Professor Wang, I've been sick. Um, I brought a medical certificate for the classes I missed.

W: Oh, Craig, I hope you're feeling better.

M: (1) I am, professor, but I'm just a little worried. Isn't the field trip this week?

W: That's right. We're leaving on Saturday about a half hour before sunrise. (2) We'll be going to the outskirts of the city. There's spot where the class can watch how the sun plays with the scenery, and the class will learn how to use natural light when taking photographs. But you've been absent for a while, I am afraid there's a lot you've missed.

M: (1) Yeah, so I have a few questions, especially about the lens and type of film to use.

W: Yes, since we'll start taking pictures at dawn, the lens and film type would be the same when you're in an existing light condition rather than in natural light. (3) Much of the stuff lectured on has to do with the different effects of light as the light changes. This is particularly important when you have a subject and you need to watch how the light casts shadows. You look a bit overwhelmed, Craig.

4. A) Purchase a better

B) Visit the area they

C) Study the referenc

D) Practice taking pi

Q: What does the w
